***Examiner's Amendment***

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given by Mr. Lee Eubanks during a telephone interview on October 13, 2006.

The application has been amended as follows:

In the drawings:

Fig. 10, insert -- 82 -- and replace the reference number "212" of the "Data Processor Module" with -- 84 -- (see attached proposed drawing changes).

Replace Claim 56 with the following:

-- 56. (currently amended) A method of operating a motor having a rotor and a stator, comprising:

accessing at least one motor database;

providing ~~[[the]]~~ an instrumentation system with electrical input data obtained during testing of the motor;

operating the instrumentation system to establish estimated values of a plurality of electrical parameters of the motor based at least partially on the motor database, [[and]] the electrical input data, and cable resistance data; and  
outputting and/or storing the estimated values of the plurality of electrical parameters established through operation of the instrumentation system;  
wherein accessing comprises retrieving previous testing data for the motor. –

Kawaga et al. (US 5,687,094) discloses an apparatus (Figure) which calculates the load based on motor data input and data from the test database (column 7, lines 4-6). However, Kawaga et al. is silent about establishing estimated values of a plurality of electrical parameters of the motor based on cable resistance data.

### ***Reasons For Allowance***

The combination as claimed wherein establishing estimated values of a plurality of electrical parameters of an electric motor based on electrical input data and cable resistance data (claims 16, 28, 56, 67-69) is not disclosed, suggested, or made obvious by the prior art of record.
